

## Application Development

Glynt provides web and mobile application development, creating software solutions tailored to the specific needs of your organization.

Our Team will establish a customized plan for building your application through a holistic understanding of the business' objectives and existing platform and integration requirements, while imploring the latest in software-development strategies; including where applicable:

- Discovery and Planning
- Application Development +
  - UI/UX Design, Prototype, Deliverable
- Project Management
- System Integration
- Quality Assurance and Testing
- Third Party Integrations and Custom API Development
- On-Going Maintenance and Support

## Application Modernization

Glynt will breathe new life into your legacy, outdated or abandoned applications.

Modernizing software applications is essential for Organizations that want to stay competitive in today's fast-paced business environment, as well as ensuring hardened security and compliance. By establishing a new baseline allowing for security and compliance initiatives, we will increase efficiency, improve user experience, and enhance features, capabilities and cost savings.

- Reduce Vulnerability / Improve Security
- Adherence to Compliance Requirement
- Increase Efficiency
- Improve the User Experience
- Access or Develop New Features and Capabilities
- Optimize and Reduced Costs
- On-Going Maintenance and Support

## On-Demand / Flex Services

The right resource, for the right amount of time, for when you need them the most.

Glynt's On-demand and Flex Services will provide your Organization with a customizable pool of hours that can be leveraged across a variety of resource needs.

When the business demand creates pressure for IT, gain the experience you require with the flexibility to supplement or augment your technical requirements so you can focus on the core of your business.

- Pool of experienced technical resources
- Flexible combination of time and resource-type
- Increase scalability and speed to market

## Resource Augmentation

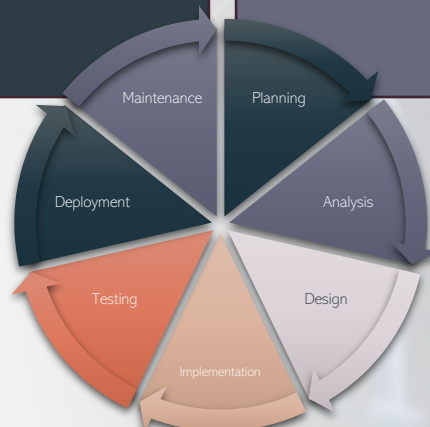

Longer-term project-based Resources, without the commitment of an FTE.

Identifying, on-boarding, developing and retaining quality technical resources are hard to come by. Glynt's Resource Augmentation can provide long-term resources (minimum 6 months) that will conduct and operate themselves as a direct extension of your in-house Team. Dedicated resources, utilizing the capabilities you need, aligned to your initiatives – all manage by Glynt.

- Forecastable Fixed Cost Planning
- Best-In-Class Technical Resources
- Budget Flexibility
- Increased Scalability

**Tailored to Your Business**  
At Glynt, we will ensure that we have a clear understanding of your desired business outcomes as well as the technical requirements and constraints.

Be it a straight-forward engagement, or one that requires adaption of the SDLC, we will adjust the level of involvement and communication throughout the SDLC to ensure that the final product your expectations.

**The Value of Glynt**  
Born from business, not just another code-to-order shop, Glynt is uniquely positioned to ensure value-creation is at the forefront of our engagements.

Through our well-established processes and methodologies, we will ensure that projects are delivered on time, within budget, and to the highest standard of quality.
